

# WINNING TOGETHER

Our business is about technology.  
But first of all, it's about people.

## Senior Cloud Engineer

We are looking for Cloud Engineers to help us deliver key projects, build valuable relationships both within COMPUTACENTER and with clients, and develop strong capabilities through working with senior team members and talented colleagues. With a validated background, the candidates must prove an expertise in multi-cloud platforms and ability to add value through excellent delivery, enabling cost effectiveness.

## Responsibilities

- You will support the introduction, further development and operation of cloud platform (s).
- You use DevOps methodologies for the deployment of complex infrastructures and services.
- You will work in agile interdisciplinary teams with internal and external customers.
- You participate in the development of optimized deployment scripts and methods.

## Requirements

As a Senior Cloud Engineer, you are used to setting the course and can successfully argue your opinion with the team and the customer. You also have:

- 4-8 years of professional experience in the above-mentioned areas
- Good understanding of software development processes
- You are very familiar with keywords such as Cloud Governance, IaaS, PaaS, SaaS, Dev "Sec" Ops, Containers, Cloud-native, CI / CD Pipelines, Infrastructure as Code, Terraform, Ansible, Cloud Monitoring, Cloud Security as well as Windows & Linux
- Already gained experience in multi-cloud environments (MS-Azure / AWS / Google)
- Good scripting skills (Bash, Python)
- Experience with CI/CD tools (Jenkins)
- Understanding of containerisation principles and frameworks (Kubernetes, Docker)
- Good understanding on how the internet and web applications work

# WINNING TOGETHER

Our business is about technology.  
But first of all, it's about people.

- Independent way of working as well as creativity, the ability to work in a team and a confident manner
- Availability for On-call work outside business hours (extra paid)
- Ideally, you have one or more of the following certifications:
  - AWS - DevOps Engineer
  - AWS - Solution Architect Professional / Associate
  - Microsoft AZ-300 & 500
  - Microsoft AZ-400
- Strong root cause analysis skills, investigation, diagnosis and reporting
- Very good English skills

## About us

Computacenter is a leading independent provider of IT infrastructure services, with about 16,000 employees worldwide and a global revenue of £5.05 billion. We work

at the heart of digitisation, advising organisations on IT strategy, implementing the most appropriate technology and managing our customers' infrastructures.

We offer a friendly, open working environment without too much fuss about hierarchy. We are looking for professionals with diverse competencies, personalities and strengths who want to live our shared value of teamwork and performance.

Interested in joining a company with a strong sense of community?

We're growing. We're hiring. We encourage. We empower. We support.
